1. SIS update – Seng
 - a. Implementation of SLATE is underway for Admissions. This is a replacement of the recruitment plus system that is used for recruitment and application processing. Target is implementation by June 2013 for Fall 2014 processing.
 - b. INTO
 - i. Integration of non-credit English language programs into ARIES is in progress. This is a very complex project to combine non-credit programs in ARIES with the rest of the student body. Target term is Fall 2013.
 - ii. The INTO recruitment system (salesforce) interface to ARIES should be completed early in 2013. This will automate the load of INTO applicants to ARIES.
 - iii. Issues related to INTO staff member access to systems have been sorted out.
 - iv. Systems are in place for the manual processing of the 2nd full term, spring 13, in ARIES.
 - c. Investigation of a classroom scheduling software system will be completed soon and a funding request for FY14 will be prepared. This will support efficiencies needed in classroom utilization and seat occupancy as we grow enrollments toward 2020 goals.
 - d. Fall Grades – Full systems test with RamCT loads was completed this week in preparation for Fall grades in 2 weeks.
2. IS update – Engmark
 - a. Project completed this past quarter:
 - i. Prep for fiscal year-end
 - ii. Vista Plus (application report repository) upgrade
 - iii. ODS Upgrade
 - iv. Slate Integration Phase I (New Admission System)
 - v. HR System Replacement Evaluation
 - vi. Curriculum Management application investigation and recommendation
 - b. Projects Cancelled this past quarter:
 - i. Recruiting application (Central Apps)
 - c. Project continued:
 - i. KFS Upgrade
 - ii. KC Implementation
 - iii. Rice Upgrade
 - iv. KC/eThority Reporting
 - v. Migrate KFS Application layer from AIX to Linux
 - vi. Virtual Storage Implementation and Data Mirroring
 - vii. Shibboleth/Grants.gov/LOA
 - viii. INTO/Banner Integration

- ix. IEP implementation in Banner
 - d. Projects began this quarter:
 - i. Upgrade to Web Logic Middleware for Banner
 - ii. Red Flag Compliance
 - iii. Upgrade AIX
 - iv. UTFAB Technology Requests
 - v. Upgrade HR System
- 3. HRS update – Domanik
 - a. PeopleAdmin which is an applicant tracking/onboarding, position management and performance management application.
 - b. Implementation targeted for January 2013-June 2013.
 - c. HR system replacement (VERY slow progress).
 - d. Major HR upgrade anticipated in Q1 FY13.
 - e. Rollout of additional Employee Self-Service functionality by end of Q2 FY13.
- 4. KFS update – Mike Giebler
 - a. KFS is mostly business as usual as we wait for anticipated upgrades. CSU's planned adoption schedule for these upgrades is as follows:
 - i. Implement 5.0.2 end of year, 2013. This is a public patch release for KFS. This is anticipated to be available February 2013. Review and testing of this release will begin on campus in spring, 2013.
 - ii. Travel module – end of 1st quarter 2014. The travel module is not a part of the 5.0.2 release but is compatible with that release. We are looking at integrating the two in this time frame.
 - iii. Implement release 5.2 - tentatively planned for fall, 2014.
- 5. Kualii Coeus update – D. Hoffman
 - a. Working with BFS & IS to determine a final date to upgrade KFS to a version that will be compatible with KC. Sponsors will meet on our recommendations on the 18th.
 - b. The New Research Project Status Portal is underway and will be launched in Mid-January.
 - c. Up to date news and progress available by signing up for the KC Blog at <http://csukualicoeus.wordpress.com/>.
- 6. Mobile web communications – L. Taylor
 - a. Apps available for the Droid and Apple; search on 'csu'.
 - b. Info about the app will be posted on the RAMWeb login page during the time students will likely be checking grades.
 - c. Full communications plan for mobile that will begin in late January after students return from break.
 - d. Committee discussing requests from students and other campus entities. Examples include, links to RamCT, RAMWeb, LSC renovation, Rec Center, Career Fairs section, Preview/Ram Welcome, Safety and AEDs, and Admissions.
- 7. ISTeC Cray update has been completed – Burns
- 8. GigU activities – S. Baily

- a. CSU has been in active discussions with the City of Fort Collins and the Gig.U consortium (see <http://www.gig-u.org>) in an effort to promote the adoption of gigabit networking development in the Fort Collins community.
 - b. Fort Collins community did not respond to Gigabit Squared RFP
 - c. We are still researching means of funding the project, establishing key stakeholders and project champions.
 - d. More details will be available as we gain traction in this activity.
9. Echo360 deployment – R. Scott
- a. Eighteen classrooms on campus equipped with Echo appliances; Personal capture software available for laptop/desktop recordings as well.
 - b. Use thus far has been by OnlinePlus; approximately 2200 lectures recorded this semester.
 - c. Promotion efforts include directly contacting instructors using equipped rooms, PDI, CAT courses coming.
 - d. Project documentation: <http://help.echo.colostate.edu>.
10. Blackboard (RamCT) – R. Scott
- a. Transition to hosted system complete; legacy on-premise system available for grade challenge and a few OnlinePlus users through May, 2013.
 - b. Upgrade to Service Pack 9 scheduled for 12:30am, January 2, 2013 – estimated 8 hours downtime.
 - c. Mobile app available (search for Blackboard Mobile Learn) for iOS, Android, Blackberry, webOS. With very little promotion thus far, 4600+ unique logins/week, 78% iOS, 21% Android, <1% Blackberry.
